

The AromaStat I

For Wide Area Diffusion with Multiple Fragrance Delivery

The AromaStat I is a fragrance delivery system for large, open areas of your business. Following the airflow of your HVAC system, the fragrance can adequately cover over 10,000 square feet. The AromaStat I is the only dry-wave system for wide area scent diffusion in the industry. By using our unique closed-system cartridges, there is no direct handling of oils or refilling bottles. Your ducts are kept clear of dangerous cumulative oily deposits, system wide. For easy installation, the AromaStat I comes with simple instructions and 24/7 full tech support.

For easy operation, the AromaStat I has a super-sleek LED interactive panel for system wide adjustment of time settings, all at the touch of a finger.

With cutting edge interactive technology made in the USA – the AromaStat I is a custom solution for your wide area fragrance disbursement.
