**RE: "SNOW MASTERS EVAPORATIVE SNOW"**

This report follows up on work conducted and reported in our Test Report 05-0676 of 20th December 2004, following several formulation changes.

We were requested to evaluate the potential health & environmental impact of the product "*SnowMasters evaporative snow fluids*" when used in its normal manner in snow making machines.

The product is sold as a means of making fake snow for events both indoor and outdoor. The product is mostly aimed at large open venues but has been used in smaller confined venues on occasions.

My findings in this report are as follows: This product is safe to be around food, humans and animals.

Yours faithfully,

*Drink Safe Labs.*

John R. Franceschini
